

IMMUNISATION POLICY

When groups of children are together, illness and disease can spread rapidly. Preventable diseases such as measles and whooping cough can have serious health consequences for children, and especially young children. Staff members who work in school aged care services are also at increased risk of contracting certain infectious illnesses due to the close proximity of working with children. Immunisation is therefore an important health measure and an effective way of protecting children and adults from harmful diseases by reducing the spread of disease.

(Australian Government Department of Education, Skills and Employment, 2020)

NATIONAL QUALITY STANDARD (NQS)

QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY		
2.1	Health	Each child's health and physical activity is supported and promoted.
2.1.2	Health practices and procedures	Effective illness and injury management and hygiene practices are promoted and implemented.
2.2	Safety	Each child is protected
2.2.2	Incident and emergency management	Plans to effectively manage incidents and emergencies are developed in consultation with relevant authorities, practiced and implemented.

EDUCATION AND CARE SERVICES NATIONAL LAW AND REGULATIONS	
174(2)(a)	Notification to the Regulatory Authority- (a) any serious incident at the approved education and care service
12	Meaning of serious incident
77	Health, hygiene and safe food practices
86	Notification to parents of incident, injury, trauma and illness
87	Incident, injury, trauma and illness record
88	Infectious diseases
90	Medical conditions policy
162	Health information to be kept in enrolment record

168	Education and care service must have policies and procedures
172(2)(g)	a notice stating that there has been an occurrence of an infectious disease at the premises

--	---

PURPOSE

The purpose of this policy is to provide information to manage and prevent the spread of infectious illnesses and diseases. Our OSHC Service has a duty of care to ensure that all children, families, and educators are protected from infectious diseases whilst at the Service. Along with maintaining a clean and hygienic environment, this also includes notifying families and educators when an excludable illness or disease is present in the OSHC Service, maintaining a record of children's and educators' immunisation status, complying with relevant health department exclusion guidelines, and increasing educators' awareness of cross-infection.

SCOPE

This policy applies to children, families, staff, educators, approved provider, nominated supervisor, students, volunteers and visitors of the OSHC Service.

IMPLEMENTATION

Immunisation is a reliable way to prevent many childhood diseases. Immunisation works by giving the person a vaccine (weakened or killed disease-causing bacteria or virus), against a particular disease. This makes the person's immune system respond in a similar way to how it would respond if they actually had the disease, but with less severe, or possibly no symptoms. The vaccine therefore leads to the creation of antibodies that provide future protection if the person comes into contact with the disease.

Immunisation also protects other people who are not immunised, such as children who are too young to be immunised, or people whose immune systems did not respond to the vaccine. This is because the more people who are immunised against a disease, the lower the chance that a person will ever come into contact with someone who has the disease. The chance of an infection spreading in a community

therefore decreases if a large proportion of people are immunised, because the immune people will not become infected and can protect the vulnerable people; this is known as ‘herd immunity’.

Enrolment in an Out of School Hours Care service requires parents to provide an *Immunisation History Statement* as recorded on the Australian Immunisation Register (AIR) to prove that their child is up to date with their scheduled vaccinations. This documentation also is required to be updated as per the childhood immunisation schedule.

When enrolling a child in an Out of School Hours Care service, parents will be asked to provide an Immunisation History Statement. Should a child not be fully immunised according to the National Immunisation Program Schedule, they will not be prevented from enrolling.

Children without proof of recommended immunisation for their age will be excluded from attending the service during an outbreak of a vaccine preventable disease. For a child to be eligible for Child Care Subsidy and other family payments, immunisation must be in accordance with the National Immunisation Program (NIP) Schedule.

THE APPROVED PROVIDER / NOMINATED SUPERVISOR WILL:

- ensure that obligations under the *Education and Care Services National Law and National Regulations* are met
- ensure educators, staff, students, visitors and volunteers have knowledge of and adhere to this policy and associated procedure
- ensure all new employees are provided with a copy of this policy as part of their induction process
- ensure information about immunisation, infectious diseases and exclusion periods is available to families at time of enrolment/orientation and is included in the Family Handbook
- request families to provide an AIR Immunisation History Statement or an AIR Immunisation History Form (for a child on an approved catch-up-schedule) prior to enrolment
- record in the immunisation register, children as ‘unimmunised’ if an AIR is not provided
- advise parents and families about the [National Immunisation Program \(NIP\)](#)
- review children’s immunisation regularly, updating the child’s records kept at the OSHC service
- develop a staff immunisation record that documents each staff member’s previous infection or immunisation
- require all new and current staff to complete the staff immunisation record
- update staff immunisation records as staff become vaccinated

- provide staff and families with information about vaccine-preventable diseases
- take all reasonable steps to encourage non-immune staff to be vaccinated
- document advice given to educators and other staff, and any refusal to comply with vaccination requests
- notify the Public Health Unit of any outbreak of vaccine preventable diseases (1300 066 055)
- notify families when an outbreak of a vaccine-preventable disease occurs through various channels of communication:
 - verbally
 - through a letter from the educator or approved provider
 - posting a note or sign at the entry of the residence
 - via electronic message- text message or email
- notify the regulatory authority of any incidence of a notifiable infectious illness or disease [ACECQA contact regulatory authority](#)
- exclude any child who is not immunised from the OSHC Service if and when an outbreak of a vaccine-preventable disease occurs to protect that child and to prevent further spread of infection. In the instance of the child being immunised but the immunisation record has not been sighted by the Service, the child is to be considered as not being immunised.
- advise any staff members who fall pregnant to discuss [Cytomegalovirus during pregnancy](#) (CMV) with their doctor and inform management so that an individual risk assessment can be assessed and managed. There is NO vaccination to prevent against infection with CMV. Occupational risks of CMV in childcare should be managed and control measures implemented. CMV [see: Pregnancy in Early Childhood Policy]

FAMILIES WILL:

- adhere to the OSHC Service's policies regarding *Dealing with Infectious Diseases, Immunisation, Incident, Injury, Trauma and Sickness Policies* and exclusion requirements
- provide the OSHC Service with a copy of one or more of the following documents upon enrolment
 - an Australian Immunisation Register (AIR) Immunisation History Statement which shows that the child is up to date with their scheduled vaccinations; or
 - an AIR Immunisation History Form on which the immunisation provider has certified that the child is on a recognised catch-up schedule; or
 - an AIR Immunisation Medical Exemption Form which has been certified by a GP
- provide the OSHC service with an updated copy of their child's current immunisation record when the next scheduled immunisation has been completed

- complete their child’s immunisation schedule
- support their child’s exclusion from the Service if there is an outbreak of a vaccine preventable disease at the OSHC Service or if they come into contact with a person with a vaccine preventable disease, even if there is no outbreak at the Service or Primary School.

AUSTRALIAN GOVERNMENT DEPARTMENT OF HEALTH- IMMUNISATION SAVES LIVES

Currently there are different immunisation requirements for early childhood education and care services across states and territories. OSHC Services who operate as part of an approved ECEC service may need to ensure information on immunisation requirements as available to all families and updated as required.
